iOS Tech Test

We've devised a technical test for you. We hope you find it fun, interesting and challenging.

The Brief
Create an app using an API that you find interesting.

If you're having difficulties finding an API, take a look at https://github.com/public-apis/public-apis/blob/master/README.md.

Use the best engineering practices wherever you can. You should be looking to demonstrate the following values:
• performance
• readability
• maintainability
• testability
• scalability
• simplicity

Keep a clear separation of concerns within your app - use your preferred pattern for this.

Or…
If you already have an open-sourced app or library that you think sufficiently demonstrates the values above, you can share that with us instead.

Time Limits
Please complete within 1 week.

Once you've created the app, upload it to GitHub and share with us.

Good luck!
